

Powerfoil X LED

Put it where the sun don't shine

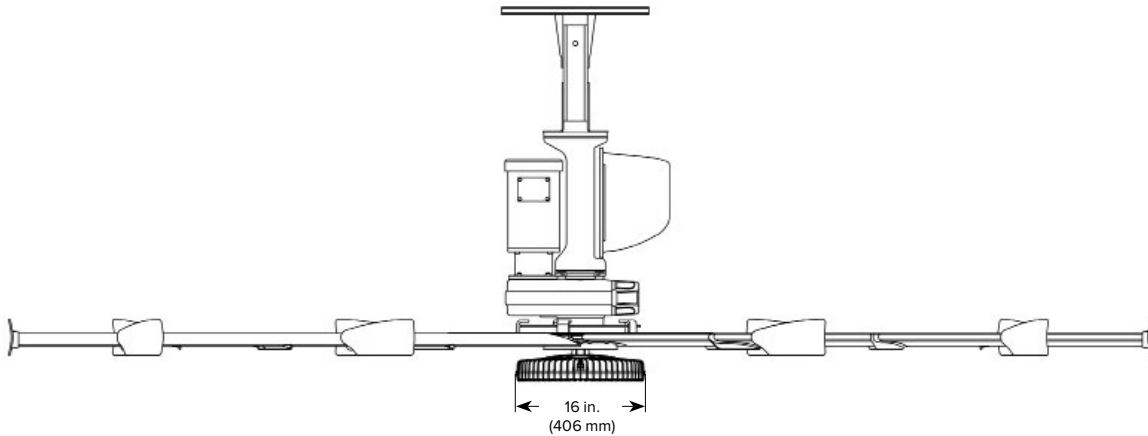

The strongest, most adaptable ceiling fan on earth is now also the brightest. Big Ass Fans' LED for Powerfoil®X and Powerfoil X2.0* fans provides unimpeded light where facility managers and building occupants need it most. This energy-efficient light seamlessly integrates with your existing building lighting grid, providing maintenance-free operation and excellent light output.

Features and benefits

- Exceptional light output and distribution
- Energy efficient for low operation cost
- Impact and vibration resistant to withstand industrial environments
- Lower LED operating temperature reduces internal heat load
- Integrates seamlessly within your existing lighting grid for optimum light and fan placement
- Engineered optics for reduced glare
- Mercury free
- Instant on/off increases productivity and reduces downtime
- 5-year full-performance warranty; LM70 rated up to 100,000 hours

**Static tube required for LED installation.*
